The screenshot shows the 'Desktop' menu with the following items: Alert Review, Appointments, Telephone Consults, Search, Patient List, Consult Log, Co-signs, New Results, Reports, Tools, Sign Orders, CHCS-I, and Immunizations Admin.

The image shows the 'Reminders' app icon on an iPhone. It consists of a blue header bar with the word 'Reminders' in white text and a close button (an 'X' in a square) on the right. Below the header is a light beige area containing a blue circular icon with a white bell and a checkmark. At the bottom is a white rectangular area, currently empty.

S/D SO Note Written by USER, TEST @ 08 Aug 2006 0936 EDT
Chief complaint
 The Chief Complaint is: Possible ankle sprain right. Patient has a severe limp
Subjective
 Pt reported trauma to his right ankle while playing football with his children last weekend. The pain was moderate at first, then quickly became severe. He stated he is having difficulty walking. The patient has Type I Diabetes which is currently controlled. There is a paternal history of lung cancer
Review of systems
Musculoskeletal symptoms: Ankle joint pain worse with weightbearing
Objective
 Patient is demonstrating a limp favoring his right ankle. There is some swelling with 2+ edema around his left ankle. The patient demonstrates pain when required to move his left ankle. Pt complained of some loss of sensation in his lower left leg

 Comments: **Fell while running.**

S/D **S/O Note** Written by USER, TEST @ 04 Aug 2006 1012 EDT
Chief complaint
 The Chief Complaint is: **Possible ankle fracture right**

History of present illness
 The Patient is a 17 year old female.
 • Right ankle soft tissue swelling with black and blue discoloration • Posteromedial right ankle joint swelling

Past medical/surgical history
Reported History:
 Physical trauma: Right ankle trauma with the ankle turned in.

Diagnosis History:
 Open fracture of the right ankle

Therapeutic History:
 Closed treatment of weight bearing distal tibial fracture

Personal history
 Behavioral history: No tobacco use
 Alcohol: No consumption of alcohol

Family history
 Maternal history of:
 Diabetic cataract

Review of systems
Systemic symptoms: Previously well and no illness since last visit. Temperature of 101 F taken at home. No chills. Night sweats.
Pain can be controlled: Pain controlled by rest, pain controlled by medication, and pain controlled by changing position.
Pulmonary symptoms: No dyspnea and no cough.
Endocrine symptoms: Excessive thirst, feeling dehydrated, and generalized muscle weakness.
Skin symptoms: No skin scaling. Erythema.
Musculoskeletal symptoms: No distal right leg soft tissue swelling. No thigh pain, swelling or stiffness and no knee pain, swelling or stiffness. Ankle joint pain worse while standing, while walking, ankle joint stiffness on the right, right foot stiffness, and foot pain in the right foot.
Neurological symptoms: Limping with the right leg.

Physical findings
Vital signs:

Vital Signs/Measurements	Value
Oral temperature	101.4 F
RR	58 breaths/min
Systolic blood pressure in the left arm	120 mm Hg
Blood pressure	
• PR. • Pulse rate while lying down. • Blood pressure. • Diastolic blood pressure in the left arm.	
Pain Level (0-10):	Value
Pain level at rest	5
Pain level with movement	8

Known Issues

- * **AHLTA and ADM**
- * **AHLTA Codes**
- * **How to Resolve**

AHLTA and ADM...

- * **We've had some growing pains**
 - **Multiple reasons**
 - **Midtier file being inappropriately placed**
 - **End User documenting injury after the date of the encounter**
 - **Synchronization of AHLTA and CHCS code table updates**
 - **ICD-9 code assignment in AHLTA and CHCS not consistent**

AHLTA Codes

- * **Issues have been identified with ICD-9, CPT and HCPC II code listings**
 - **Incomplete codes (missing digits)**
 - **Codes not in listing**
 - **Verbiage is incorrect**
 - **Deleted codes still available for selection**
 - **New updates not always loaded**
- * **Evaluation and Management Codes**
 - **Calculator works great with structured documentation**

How to Resolve

*** First Step**

- **Gather detailed information (screen shots, reports, identifiers to locate record for research.**

*** Second Step**

- **Call local help desk to log Trouble Ticket**
 - **Be prepared to give additional information and / or screenshots**
- **Identify if it is a Patient Safety Issue**
 - **Patient safety issues expedite the Trouble Ticket process.**

*** Third Step**

- **Forward patient safety issue to local users and command as informational broadcast (until it can be fixed)**

MHS IM/IT Program
